

# One-Profit Car Triumphs!

## Studebaker Sweeps to New Sales Peak

Your Studebaker dealer will sell you any car in his stock (new or used) on a fair and liberal budget payment plan.

The delivered price of the Standard Six Duplex Phaeton in Los Angeles is \$1385. This includes freight and war tax.

This IS a Studebaker Year

## A Year Ahead of Its Time

### The Duplex—more up-to-date than newest "yearly models"

THE Duplex Body, introduced by Studebaker in September, 1924, is a revolutionary new-type open car—with advantages open cars have never possessed before.

It has a steel-framed upper structure, built as an integral part of the body.

Within this upper structure are concealed roller side enclosures which the driver may lower in 30 seconds without leaving his seat—giving instant protection from rain, snow, cold or wind.

And with equal ease the enclosures roll up out of sight.

So obvious are the advantages of the Duplex that Studebaker has become the outstanding leader in the open car field among cars selling above \$1000.

#### Triumph of Studebaker Engineering

Other manufacturers will undoubtedly have to follow in Studebaker's footsteps. For any open car today without this unique advantage is obsolete.

But at the time this advertisement is written, Studebaker—and Studebaker alone—offers you this double convenience.

Another important engineering advantage pioneered by Studebaker is the use of genuine, full-size balloon tires, with steering mechanism, fenders and body lines especially designed for them.

Other manufacturers are gradually following Studebaker's lead—but remember, Studebaker developed this important feature 11 months ago.

On the Studebaker Standard Six Duplex Phaeton illustrated above, you'll find an automatic spark control, safety lighting control on the steering wheel, 8-day clock, gasoline gauge on the dash, improved one-piece windshield, special coincidental lock of ignition and steering gear, foot controlled cowl ventilator, completely machined crankshaft, oil drain valve which a girl can operate without soiling her hands, and waterproof ignition—all Studebaker features.

These are a few of the points which show that Studebaker cars are more up to date than the "new yearly models" which are being announced in dizzy succession.

And any automobile expert will tell you that new models of necessity are engineering experiments. Only after months of use in the hands of owners can all mechanical flaws be eliminated. Automobile engineers are human—and it takes time to eliminate mistakes.

Thus, when you buy a Studebaker, you not only get a motor car that is completely up to date, but you also eliminate all guesswork and gamble. Your new car has been tested and proved satisfactory in the hands of thousands of owners.

Go to any of the Studebaker dealers listed below—and see a "one-profit" car with the scores of thousands of miles of excess transportation. Ride in it—drive it. Ask particularly to see the Duplex—the open car which made all other open cars obsolete.

AT A TIME when the production of the automobile industry is undergoing a normal summer decline, Studebaker sales sweep on to new records because of the demand for one-profit cars.

Sales for the second quarter show an amazing increase of 48 per cent over the corresponding period of last year.

April increased 23 per cent, May 41 per cent, June 112 per cent.

Complete figures for July are not yet available, but they will exceed July, 1924, by at least 200 per cent. The quarter just closed shows the largest sales volume in Studebaker history.

These gains are not the result of artificial stimulus, but of solid, wholesome policies and the tested merit of the car.

In the first place, Studebakers are purchased freely because the company will announce no "yearly models" to depreciate them.

In the second place, Studebakers are so kept up to date as to be actually in advance of the "new yearly models" of other companies. (See column to the left.)

In the third place, the public has come to appreciate the fact that Studebaker offers the only "one-profit" automobile in the fine-car field.

By "one-profit" car we mean a motor car that has all of its vital parts designed, engineered and manufactured by one organization.

The Ford is a one-profit car and reigns supreme in its field.

In the fine-car field Studebaker—and Studebaker alone—now offers the American public one-profit values.

Studebaker is the only fine-car manufacturer today building all of its own bodies, engines, clutches, gear-sets, springs, differentials, steering gears, axles, gray iron castings and drop forgings.

Thus Studebaker, by eliminating the extra profits and overhead of outside parts and body makers, is able to offer you a much better car for the money.

A better car because Studebaker in its own plants converts raw materials into finished units, designed solely for Studebaker cars. These units are brought together to form a perfectly balanced—perfectly coordinated whole.

A better car because Studebaker, being an independent manufacturer with no subsidiary or allied companies to favor, is free to buy on the open market, demanding the highest quality at the lowest possible price. Studebaker purchasing agents are unrestricted in their search for quality and value. Studebaker designers and engineers are unhampered by outside interests.

A better car because all Studebaker automobiles are quality automobiles—built to render a service rather than to meet a price. This 73-year-old business has always built for tough, enduring merit in its product. Today it has net assets in excess of one hundred million dollars, no bonded debt and no bank loans. All its resources are concentrated upon the production of automobiles that will yield comfort, performance and scores of thousands of miles of excess transportation.

A better car because it will never be an "orphan car." Five hundred automobile "manufacturers" have gone out of business and 600,000 of their "orphan" cars are in the hands of the public. But for many years more than half of all the earnings of Studebaker have been retained for plant development. You may buy with confident assurance that not only next year but far into the future thousands of Studebaker dealers will be equipped to render service on your sturdy, thrifty, one-profit car.

**WOMAN FACING DOUBLE CHARGE**

Will be Tried for Reckless Driving and Intoxication

Wealthy Pasadena Matron Has Trio of Defenders

Three Lawyers With as Many Ideas of Procedure

By a "Times" Staff Correspondent  
PASADENA, Aug. 2.—Great interest is being taken here in the case of Mrs. Matilda E. Wood, wealthy Pasadena matron, who will go on trial tomorrow morning for intoxication and reckless driving. Mrs. Wood is being represented by three lawyers, one of whom demands a jury trial, another who does not want one, and the third who does not care. The defendant was unable to agree, the case was postponed.

Further interest in the case is evidenced here because of Judge Frank Dunham's policy of trying all people found guilty of both intoxication and reckless driving. Never before has a woman appeared with the two counts against her, but court attaches believe that the court will make no exception, and mete out the customary thirty-day sentence.

Mrs. Wood, who resides at 5 Ford Place, an exclusive residential area, was arrested several weeks ago at Colorado street and Marston avenue. It is charged by officers that Mrs. Wood's car collided with another car and she then put her machine in reverse and backed up approximately 100 feet, striking another machine.

The fair defendant spent the night in the Pasadena City Jail. All she would say was that her husband was to blame for everything. She would not explain this further, except that marital troubles at her home were much in evidence. While in jail Mrs. Wood declared she would not plead guilty, but when she appeared in court Friday there were three to defend her. Each one of the three was ignorant of the fact that there were other attorneys working on the case. One attorney had previously asked for a jury. The jury was waiting in court, but the second lawyer came in first, and not wishing a jury trial, ordered the panel dismissed. With the arrival of the other two defenders the defense was declared experienced difficulties. They could not agree among themselves, and wishing a jury trial, had to have a jury trial. It was found that the jury had been dismissed, and now, the interesting question will be heard in Police Court tomorrow morning.

**Venice Bodies Voice Approval of Bond Issue**

By a "Times" Staff Correspondent  
VENICE, Aug. 2.—The preparing and distribution of sample ballots for the \$1,185,000 bond election to be voted upon the 14th inst. will be completed early in the week, according to City Clerk Hanne.

Included in the issue is the voting of \$50,000 for the city's share to assist in the purchase of the Westwood site for the University of California, Southern Branch. Other issues on the ballot include more adequate police protection, the erection of a municipal auditorium and other needed public improvements. It is believed the issue will carry, but sentiment being strongly in favor of the bond issue, the Council has given written notice of their approval.

**CHILD LOST FINGERS**

HANFORD, Aug. 2.—Robert Elliott, 4-year-old son of Mr. and Mrs. B. N. Elliott, living north of Corcoran, had three fingers removed at a local hospital as a result of the explosion of a dynamite cap which he found and was experimenting with.

**CHICKEN THIEVES PASS UP CULLS**

Wait Until Drive 400 Are Sold, Then Take 400 in High-Grade Flock

(LOCAL CORRESPONDENCE)  
ROSCOE, Aug. 2.—Professional chicken thieves in San Fernando Valley, who sometimes "swipe" at one swoop an entire Leghorn flock, don't go about the business with slap-bang or hit-or-miss methods. They wait the high-grade stuff or nothing. As much care is taken in getting what is wanted as is exercised by yeggs fixing to rob a \$1,000,000 bank.

James Thomas of Wicks street had 1200 hens in his henery. Every rooster's daughter of 'em was as safe as in her pre-nuptial days. Thomas culled 200 and sold them. Next day he culled 200 more. Still he wasn't satisfied, and he culled 200 more and shipped them to market, leaving 400 of the finest laying strain in this section.

Night before last, the growing moon slipped in behind the only cloud hanging over the valley. When it emerged again the prize hens were gone.

**CHOSEN LA FIESTA ESPANOLA QUEEN**

Miss Isch

LAGUNA BEACH, Aug. 2.—Miss Katherine Isch has been chosen unanimously to be queen of La Fiesta Espanola to be given in Laguna Beach, the 5th, 6th and 8th inst. She is the daughter of Mr. and Mrs. J. N. Isch, Laguna Beach pioneer. She is a student at the Southern Branch of the University of California, Los Angeles.

**Lankershim is Planning for Free Delivery**

(LOCAL CORRESPONDENCE)  
LANKERSHIM, Aug. 2.—The announcement that the National Postoffice Department has granted Van Nuys free mail delivery to begin October 1, has served as an incentive here for the starting of a program to complete the side and not wishing a jury trial, ordered the panel dismissed.

Lankershim virtually has been promised free mail delivery as soon as the side is completed. While a move is being made by the local post office to the establishment of a third rural route delivery, embracing residents residing south of here toward the Ventura Boulevard section. At present their mail is addressed to Hollywood.

In the argument for the new rural route, it is maintained that persons are more likely to do their shopping in the town to which their mail is addressed.

**OLD TOWN CLOCK AT RIVERSIDE REMAINS**

(EXCLUSIVE DISPATCH)  
RIVERSIDE, Aug. 2.—The town clock, landmark and leaning post for countless hundreds of Riverside since it was first erected at Eighth and Main streets, is to remain at its old stand, according to action taken by the City Council.

The clock, some time ago, expressed their intention of removing the clock because the Western Land Company's plan to increase the keeping the timepiece in action. It is now understood that the assessment will not apply to the useful appendage at the city's main corner. In compliance with their decision not to accept the telegraph company's increase, the Council have had the main clock removed from the Council room at the City Hall.

**INCREASE SEEN IN ACREAGE FOR GRAPES**

(EXCLUSIVE DISPATCH)  
RIVERSIDE, Aug. 2.—Grape acreage increases in the Coachella Valley as a result of the satisfactory harvest just completed. The report made to the commissioner of agriculture by H. G. Bloom, deputy commissioner, is that 150 carloads were shipped to eastern markets during the closed harvest, quoting a 25 per cent increase in the acreage.

Twenty carloads were shipped by express to Los Angeles, San Francisco and other Coast points, making in all a shipment of about 170 cars from the valley this year.

**ARMISTICE DAY PLANS IN KINGS OUTLINED**

(EXCLUSIVE DISPATCH)  
HANFORD, Aug. 2.—Plans are being outlined for a joint observance of Armistice Day by the posts of the American Legion of Kings county and at Corcoran, and the units of the Auxiliary of the American Legion at these places are to participate. A parade, patriotic program and other attractive features are to be arranged.

**RIDING CLUB FORMED**

(LOCAL CORRESPONDENCE)  
GIRARD, Aug. 2.—A horseback riding club, to be known as the Bit and Spur Club, has been organized here with the following members: L. G. Peterson, J. H. Barnes, J. D. Schulman, J. M. Lytle, Fred Noble and Mrs. G. V. Noble, and Mrs. Winifred Landers. Early morning rides through the western part of the county are now scheduled as part of the new club's program.

**HANFORD PAYS FIDDLER**

(BY A. F. NICHOLS)  
HANFORD, Aug. 2.—The Trustees have appropriated \$250 for the music for five Saturday night free street dances. The allowance was made on request of the Retail Merchants' Bureau of Hanford.

**AVALON EXPECTS CROWD**

Ten Thousand Members of Legion and Auxiliaries Will Attend State Convention There

(EXCLUSIVE DISPATCH)  
AVALON (Catalina Island) Aug. 2.—More than 10,000 members of the American Legion and auxiliaries are expected to convene at Catalina during the State convention to be held here from September 13 to 17, according to the announcement made by State Department Commander Nathan Combs.

Three hundred and six State posts will be represented at the convention with 1187 delegates named to attend. The convention is planned to allow for a general outing and get-together for the entire State organization of the American Legion and its auxiliaries for the discussion of vital problems affecting community, State and national life.

The American Legion State Convention committee which has been appointed by Commander Combs includes Frank F. Palmer, president, by Leonard Wilson, William Kolander and A. B. Waddingham.

All bungalows of Island Villa and Villa Park have been reserved for the Legionnaires during the convention.

Sunday, the first day of the convention, will be given over to registration and a dance. Monday, the Eight and Forty will hold their Eight and Forty will hold their

The State convention will be formally called to order Tuesday morning at 10 o'clock. The address will be made by Gov. Richardson to be followed by several noted speakers.

Twenty committees will be active during the Catalina convention and work on reports which are to be presented to the general assembly for discussion. Committees of finance, care of the sick and disabled, ex-service men, the widows and orphans of deceased members, and the children of members, will come up at the convention.

A lighter feature of the convention is the elaborate entertainment program which is being worked out. Tuesday night the women's auxiliary is planning a musical evening. Hurst and Samuels will hold a reception at the Pavilion Building on Wednesday night. The "Wreck" initiation. A circus parade is to be staged and the famous character procession down Crescent avenue. There will be a parade of the members of the Legionnaires and their friends according to the arrangements being developed in the city.

Catalina Island No. 137.

**Wage Schedule in Fig Harvest is Made Public**

(EXCLUSIVE DISPATCH)  
FRESNO, Aug. 2.—The schedule of wages which will prevail for picking and packing figs this season was announced today by E. Wray, secretary of the Valley Fruit Growers' Association, following a meeting of fig growers and packers.

It is estimated that approximately forty carloads of California figs will be shipped fresh this year under improved facilities.

The schedule is as follows, wrapping and packing included: 1925, 1926, 1927, 1928, 1929, 1930, 1931, 1932, 1933, 1934, 1935, 1936, 1937, 1938, 1939, 1940, 1941, 1942, 1943, 1944, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1952, 1953, 1954, 1955, 1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963, 1964, 1965, 1966, 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, ## Fortieth Annual Southern California Tennis Championship in First Round Today

## MANY CHAMPS NOT ON HAND

Three Hundred Not Stars to Play During Week

Many New Title-Holders to be Crowned

Fottrell Meets Barker in Feature Match Today

One hundred star tennis players set into action today in the opening round of the fortieth annual Southern California tennis championships at the Los Angeles Tennis Club. This is exactly one-third the total entry list. The tournament is scheduled to end next Sunday.

The entry of many new players in the tournament and the absence of many of last year's champions gives the battle an added interest this year. Ben Francisco is sending Morgan Fottrell and Bobby Sellers down as its representatives. Sellers won the boys' singles championships in 1923 and 1924. He has grown out of that class and will compete with the juniors this year.

William T. Tilden, national singles champion, for two years holder of the men's singles title, along with many of last year's victors, will not be on hand to defend his laurels. There are plenty of good players to scramble for Tilden's place, however.

Miss Marion Williams, of Los Angeles, who has held the women's singles trophy for three years running, will not be on hand to defend her laurels. There are plenty of good players to scramble for Tilden's place, however.

Plenty of good matches are on for today. Morgan Fottrell takes on E. Barker in a 5-o'clock battle that should be worth seeing. Little Nelson Dodge, semi-finalist in the 1924, is a red-hot favorite to take the crown. It is to be regretted that he will be unable to play as he is on a par and would play a match worth seeing.

Wallace Bates and Roland Roberts, last year's doubles champions, will be present to try for that crown again.

Plenty of good matches are on for today. Morgan Fottrell takes on E. Barker in a 5-o'clock battle that should be worth seeing. Little Nelson Dodge, semi-finalist in the 1924, is a red-hot favorite to take the crown. It is to be regretted that he will be unable to play as he is on a par and would play a match worth seeing.

## CHANNEL SWIM IS POSTPONED

(BY CABLE AND ASSOCIATED PRESS) BOULOGNE (France) Aug. 2.—Early this (Monday) morning Gertrude Ederle, the American girl swimmer, decided not to make an attempt to swim the English Channel. Postponement of the start was due to bad conditions prevailing in the channel.

## JOHNSON CELEBRATES HIS DEBUT

Famous Solon Heaver Beats Club He Failed to Thump 18 Years Ago

(BY A. P. NIGHT WIRE) WASHINGTON, Aug. 2.—Walter Johnson, Washington's premier pitcher, today celebrated the eighteenth anniversary of his debut as a big-league ball player by defeating the team that he failed to beat on that earlier occasion, the Detroit Tigers.

On August 2, 1907, Johnson, now recruit from the West, pitched against the Tigers in Detroit for six innings. Washington lost, 3 to 2, but "Barney" was not charged with the defeat.

Today he held the Tigers, who eighteen years ago included their present manager, Ty Cobb, to two singles and one run and the champion Senators won 5 to 1. Jones, third baseman for Detroit, got both hits, and the run was scored on an error by Center Fielder McNulty.

(Continued From Ninth Page)

baker and Flowers in a pinch hit. Root had it on the Oaks all afternoon. They did not get anything out of him until the fifth inning, when Root hit a hit until the fourth. When two safe runners were wasted, Cooper began the inning with a hit and perished trying to steal second. Makin then got a hit but was left stranded when Root hit a home run.

With one out in the seventh, Reese got a hit, but neither Pickering nor Black Miller could help. In the eighth Arlett batted for Root and gave a hit when Root knocked the ball down and then could not pick it up in time to make a play. Pickering's pinch hitter, could not hit in a pinch this time and Stats grabbed by ball. Provers swung for Root and made quick work of Cooper. Makin and Reese in the ninth and walked off with a win. ## OFF IN A SHOWER OF SEA SPRAY

Top photo shows the start of yesterday's big boat race at Newport Harbor. The photographer snapped the shutter just as the picturesque sailing craft were getting under way for their cruise. Below is shown Ray Schauer's No. 110 rounding a turn soon after the start. He is having a brush with a speedy competitor. Schauer's boat won the race.

## GARDINI DUE HERE TODAY FOR MAT GO

Italian Grappler Slated to Arrive for Bout With Joe Stecher

Renato Gardini, Italian heavyweight wrestler, is slated to arrive in Los Angeles today. A week from tonight the European star meets Joe Stecher, holder of the world's title, in the main event of the night program at the Olympic Auditorium. This show will be the first grappler's bill in the new athletic emporium, arena Wednesday night.

Gardini will put in some stiff training hours at Jack Dempsey's Manhattan gymnasium during the week and will no doubt attract a flock of mat fans there. He is a pleasing wrestler and knows most of the sport celebrities the world over.

Daro announces that tickets for the show go on sale today at 325 South Spring street. There is a big demand for seats already, and the promoter more than 2500 seats having been sold to date.

## Fresno Tigers Register One More Victory

(BY A. P. NIGHT WIRE) FRESNO, Aug. 2.—The Fresno Tigers continued their winning march in the Central California League by giving the Contra Costa Americans an 8-to-4 licking here today. Pete McKenry, pitcher, was the star of the game, throwing a five-hitter and one run. The victors batted in order for five innings, but he was out in the sixth and seventh and was replaced by Ty Lawson, who stopped the attack. Manager Art Ramage of the Tigers pined a homer, as did First Baseman Gernin of the McKenry today announced he had received and rejected an offer to affiliate with the Douglas (Ariz.) baseball club, which is piloted by Hal Chase. Score: R. H. E. Fresno 8 12 3; Contra Costa 4 7 0.

## CROSSMAN WINS PRICE GUN TROPHY

Shakes Off Ned Cutting for Small Margin in Rifle Meet at Schutzen Park

The real riders of the club absent on deer-hunting expeditions, a crowd of the second-raters argued out the question of the E. C. Price trophy yesterday at Schutzen Park, Capt. E. C. Crossman finally shaking off his old Nemesis, Ned Cutting, at the final shot of the match. Cutting scored 65 to 47 for Crossman. High score for the day was considerably less than respectable.

Crossman also annexed the H. E. Sargent trophy with 247 for the course of ten shots standing, kneeling and prone.

Next Sunday sees the shoot for the Ned Cutting Pan-American trophy for iron sights and rifles less than ten pounds. Also the rapid-fire match, open only to service rifles.

## I WILL FINANCE YOUR OIL WELL

Do you need a few thousand Dollars to complete your oil well? I will supply the necessary funds provided the hole is already down to a reasonable depth and provided further that you are drilling in good territory. Answer TR 7, Box 327, TIMES BRANCH.

## Activities in the Big Petroleum Fields

## TAMPICO FIELD EXPORTS DROP

Amount for First Half Year 9,271,647 Barrels

## Heaviest Decline Credited to Mexican Gulf

## Sinclair and Dutch Shell Also Among Losers

BY JACK STARR-HUNT (ST. CLAIR-EXCLUSIVE DISPATCH) MEXICO CITY, Aug. 2.—An unofficial, though reliable, report received here shows that exports of oil and oil products from the Tampico district for the first six months of 1925, totaling \$1,989,218 barrels, represented a decrease of 9,271,647 barrels from the corresponding period of the year previous.

Increased production, or purchases, is responsible for increase in exports shown by the Pan American Eastern, Standard of New Jersey and Mexican Eagle oil companies. The greatest gain was made by the former, which increased its shipments 5,103,442 barrels and in March this year established a shipping record for Mexico, over the previous month, when it loaded 4,077,932 barrels at the terminal of the Huasteca Petroleum Company in Matamoros, Vera Cruz, across the Panuco River from Tampico.

## HEAVY SHIPPER

Standard of New Jersey was the second largest exporter with 16,523,475 barrels loaded at its Las Matillas and La Barra terminals on the Panuco River at Tampico and the Chorrera terminal of the Mexican Seaboard on the Gulf Coast. The company showed an increase over the first six months of 1924 of 273,665 barrels, which was accounted for, not because of increased production, but due to approximately 1,000,000 barrels purchased monthly in the field from the Mexican Seaboard.

The Mexican Seaboard occupied third place in the list of shippers with 7,788,182 barrels, showed an increase of 2,911,484 barrels over the first half of 1924. In the case of the English company, it showed an increase largely because it is purchasing in the field the light oil production of the Mexican Seaboard, Cortes Oil and West Indies, Island Oil and Transport Company and the Texas Company, all of which have closed down their sea loading stations and now have no other method of disposing of their production.

## EAGLE DROPS SHARPLY

The greatest decrease in exports was shown by the Mexican Gulf Oil Company, which dropped from 6,510,136 barrels in the first six months of 1924, to 2,318,693 barrels between January and June of this year. In the first half of 1924 the Gulf had large heavy crude production in Cacaalao, which is now stripping but a few thousand barrels daily.

Intrusions of salt water in the heavy oil district caused a decrease of almost 2,000,000 barrels in the exports of the Sinclair; over 3,000,000 barrels on the part of the Dutch Shell; more than 1,500,000 barrels for the Southern Pacific, while the Empira Gas and Fuel Company, the Texas Company, New England (Magnolia) and the Agul (Atlantic Gulf and West Indies) showed decreases of more than 1,000,000 barrels each.

In the case of the Mexican Seaboard, which showed a decrease of 1,581,393 barrels in its exports, the decrease is not due to lack of production, but to the fact that the period in question the Seaboard had delivered more than 4,000,000 barrels of oil in the first half of 1924. Transcontinental Petroleum Company (Standard of New Jersey).

## ARIZONA MINE MAY GET TAX REHEARING

(EXCLUSIVE DISPATCH) TUCSON (ARIZ.), Aug. 2.—The phenomenal rise in the valuation of the New Cornelia mining property at Ajo may have reconsideration of the Arizona Tax Commission. The company is asking reduction of \$3,000,000 on the ground that depreciation had been figured as the company had not been informed of a change in the manner of State mine assessment.

## PACIFIC OIL TAKES OFFICES TO KINGS

The principal place of business of the Pacific Oil and Gas Company, which has offices at No. 815 South Hill street, in this city, has been changed to Corcoran, in Kings county, according to a certificate filed with the clerk of Kings county, by B. B. Dudley, president, and E. R. Dudley, secretary of the company.

## DEEPER SAND NEW GOAL

Operators in Bloomfield, New Mexico Field, Drop Theory of Paying Oil at Shallow Depth

(EXCLUSIVE DISPATCH) FARMINGTON (N. M.), Aug. 2.—Operators in the Bloomfield district have pretty generally abandoned the idea that they are likely to strike heavy production in the shallow sands from which several wells have been producing this year.

Many geologists have looked with disfavor upon the theory of large production coming from the shallow sands, but considerable drilling has nevertheless been done with that idea in view. Some of the shallow wells are still producing profitably, but the prevailing impression now seems to be that the drillers will have to go down to the Picture Cliff sand, 2000 to 2500 feet beneath the surface, to open up production of real consequence.

## TEST PLANNED

It seems probable that the first genuine test of the Picture Cliff sand will be made by the Standard Oil Company of Denver, which has just closed a deal with the Bloomfield Oil and Gas Company for 200 acres known as the Bishop tract. The Bloomfield outfit retains five acres around the well, which is to be drilled to a depth of 2500 feet, according to the agreement. The hole is now about 800 feet deep and no oil in commercial quantities has been discovered.

A conference will be held in Denver this week between the heads of the Bloomfield Oil Company and the Standard Oil Company to plan a drilling campaign for their mutual interests in New Mexico.

## MEETING CALLED

Persons interested in the Montezuma Syndicate will hold a meeting at the Montezuma Hotel, at Montezuma, N. M., this afternoon to discuss whether to carry its hole on down to the Picture Cliff sand. In the Bloomfield district, the hole is now about 800 feet deep and no oil in commercial quantities has been discovered.

A conference will be held in Denver this week between the heads of the Bloomfield Oil Company and the Standard Oil Company to plan a drilling campaign for their mutual interests in New Mexico.

The hole was drilled for the Santa Fe Mutual Oil Syndicate on a lease acquired from the Midway Refining Company. The plug hole was done by R. Threlkeld, an Oklahoma driller, and it had a 215-pound hydrostatic pressure and flowed 12,000 barrels of oil. The hole was abandoned in 1920.

## WORK RESUMED

The New Mexican Eagle Oil Company, which was the first to start drilling south of the San Juan River, has resumed drilling. Both of its wells south of the San Juan River are on government land.

The Oklahoma Oil and Gas Company has resumed drilling on the south side of the Navajo reservation and on the south side of the San Juan River.

## TWO NEW WELLS STARTED

Shell Spuds in for Deep Test on Alamitos Tract and Marland on Bixby Lease

The Seal Beach district, regarded by oil men as the most promising unproved potential oil district in Southern California, is developing almost as much drilling activity as a proven oil field. Two new wells were started there during last week, which makes a total of five drilling projects, all looking for the main structure. One well has been producing a little oil for more than a year.

The newest development is the Seal Beach No. 1 well, which is being drilled on the Alamitos tract, northwest corner of the Alamitos Land Company tract. This hole is east of the Hellman ranch, where the Associated Oil Company is drilling.

The Alamitos tract comprises about 750 acres, and was acquired by the Shell several years ago with its Alamitos leases on Signal Hill, where the Shell discovered the Long Beach field. Most of the lease is now swampy marsh land, with the exception of a portion of the Alamitos tract, where the Shell is locating its new test.

Failure of the Associated to get definite showings in its Hellman No. 1 test on the north end of the Hellman tract is interpreted as an indication that the structure is probably farther south. If this theory is true it gives the Shell a good chance for production.

The Alamitos is on the opposite side of the Hellman tract from the Shell's Bryant No. 1, from which it has been getting about 150 barrels a day. The Alamitos is about 1600 barrels of water for a year. If the structure really lies to the south, the Alamitos is practically proved, this is an additional factor in favor of Shell's test.

The Marland Oil Company is starting a new well in the north-northwest corner of the Bixby lease, which was surrendered by Shell several months ago, after it abandoned its evidence of a structure. The well is being drilled to a depth of 2500 feet. The Shell well was located in the northern corner of the Bixby lease, and the old Bixby No. 2, which was drilled by the Standard three years ago and was a dry hole at 1610 feet.

Unless the Associated gets an oil sand shortly in its Hellman No. 1, now over 5000 feet deep, the company may be expected to start a new well farther south. This is considered sufficient to make a new well on the Alamitos tract, which the Hellman calls for five test wells before quitting the lease.

Shell's Bryant No. 2, a few hundred feet north of No. 1, is drilling ahead at 5122 feet, after failing to get a water shut-off at 2925 feet. The well is still in oil sand, giving it a total penetration of eighty-seven feet. This is considered sufficient to make a new well on the Alamitos tract, which the Hellman calls for five test wells before quitting the lease.

Shell's Bryant No. 3 on the north end of the lease, Shell is drilling ahead at 5122 feet, after failing to get a water shut-off at 2925 feet. The well is still in oil sand, giving it a total penetration of eighty-seven feet. This is considered sufficient to make a new well on the Alamitos tract, which the Hellman calls for five test wells before quitting the lease.

## QUICKSAND HANDICAP IN OKLAHOMA FIELD

(EXCLUSIVE DISPATCH) OKLAHOMA CITY (OKLA.), Aug. 2.—Quicksand is such a formidable foe to oil drillers in the vicinity of the Canadian River in the northern part of Pottawatomie county, that the local industry has been compelled to abandon search for bottom of the sand on the location of his slush pit and to prepare to install a concrete base in the pit. He has a derrick up and tools installed, and the location is the Horseshoe Bend of the Canadian River.

## OIL BRINGS KERN COUPLE WEALTH

Owners of Spurred Section Suddenly Rich

Get \$35,000 for Half Sold, Other Leased

Chancellor-Canfield Midway is Reported Buyer

(EXCLUSIVE DISPATCH) FARMOSA, AUG. 2.—Considerable romance is attached to the suddenly acquired fortune of Jacob and Jesslyn Thomas, who for many years have been owners of a section of land far out on the west front extension of the Kern River oil fields.

Nobody wanted the land, Mr. and Mrs. Thomas themselves were not anxious to keep it. Mr. Thomas repeatedly sought to induce oil companies to buy the land, but they smiled at his overtures. A few weeks ago some one took a fancy to the section, and Mr. Thomas sold half of their land in fee, obtaining a substantial cash consideration of \$35,000, the second largest sum on record. So far this year their earnings have been remarkably stable, with great strides made in reducing operating expenses. If these gains are maintained throughout the fall, transportation experts predict that 1925 will be the most satisfactory year for the carriers since the war.

## TRADE SHOWS IMPROVEMENT

Basic Industries' Reports Uniformly Good

Week's Car Loadings Pass Million Mark

Prosperous Year Predicted For Railroads

(ST. LOUIS, MO., Aug. 2.)—Promises of business improvement found tangible fulfillment in many lines of industry last week. Trade irregularities were not entirely eliminated, but, as in recent weeks, they were outnumbered by uniformly favorable reports from the basic industries. Influences which might be characterized as disturbing were almost wholly absent.

Reports of railroad operations emphasized the reassuring condition of the country's trade. For the first time this year, car loadings for the third week in July crossed the 1,000,000 mark—a figure which is not normally attained until crop movements reach their peak late in August. Analysis of traffic statistics indicate the movement of diversified commodities rather than huge bulk shipments of grain or coal, a reflection of expanding wholesale and retail trade.

## RAIL EARNINGS

Supporting testimony was offered by the consistent improvement in railroad earnings during June. On the basis of statements from the leading Class One carriers, it was estimated that aggregate net operating income for the month would approximate \$92,000,000, the second largest sum on record. So far this year rail earnings have been remarkably stable, with great strides made in reducing operating expenses. If these gains are maintained throughout the fall, transportation experts predict that 1925 will be the most satisfactory year for the carriers since the war.

Growing confidence characterized the outlook in the steel industry. The larger orders which flowed in during the early part of the year were translated into substantial second quarter profits by the United States Steel Corporation, which reported total earnings of more than \$400,000. This weekly steel trade review continued to find evidence of a more pressing demand and a firmer price tendency.

## RUBBER SITUATION

Fluctuations in the price of crude rubber have been a cause for growing concern to the manufacturers. Although the price has been relatively stable since the latter part of the year, it has been previously mounting as high as \$1.20, the rubber companies would see no point of stability in sight because of uncertainties as to the further restriction of output. Holding that current prices were much in excess of production costs, one of the largest tire companies established a special raw material reserve fund to protect it against a possible material decline in rubber values.

## ADVANCE IN COTTON FOR WEEK RAPID

Drought Over Oklahoma Fairly Well Broken and Heavy Rains Fall

(EXCLUSIVE DISPATCH) NEW YORK, AUG. 2.—The market continued last week's advance through Monday's session when prices made a further rise of about 25 cents, October going up to 25.55 cents, December 25.70 cents. January 25.10, March 25.40 and next May deliveries to 25.58 cents. This advance was due to the continuing heavy rains and crop reports from Central and South Texas and from the effects of the long drought there and recent extremely high temperatures.

Some of these crop reports have made the conditions as low as 50 per cent for Texas, against 55 per cent for the national average. A further advance of about 10 per cent in the late government crop figures to July 16 contrasted with 64, its figures for June 15.

With the extensive acreage in Texas continuing to 40 per cent of this year's production, the whole picture of the cotton market is one of a prospect of Texas falling down from what looked like a record-breaking crop there a month ago, to less than an average crop, has been the strong bull card advancing the cotton markets of the last month contributing to the establishment of the above mentioned high range of prices.

With the cotton contract list established on the basis of over 25-1/2 cents, the market broke from liquidation and fresh speculative selling. There was a continuation of that pressure on Thursday and early Friday. It sent prices off before the end of the forenoon Friday to between 150 and 155 points for the active trading months from Monday's highest prices mentioned above.

On the 2550-foot level one cross-cut has passed through thirty-eight feet of the active trading months from Monday's highest prices mentioned above.

Times Office Serenaded

## KNIGHTS TO BE GUESTS OF CITY

Thousands En Route From Convention Stop Over

First of Fifteen Special Trains Given Welcome

Local Commanderies Will Entertain Delegates

The vanguard of fifteen special trains that will stop in Los Angeles for a few days with 3000 Knights Templar and their ladies en route to their eastern homes from the annual convocation recently closed in Seattle, arrived in Los Angeles yesterday.

The Southern California delegation, consisting of fifteen local commanderies, will be entertained by the city during their stay.

The first of the special trains arrived at the city station yesterday afternoon. The train was met by a large group of city officials and Knights Templar members.

The train was then taken to the city hotel, where the delegates will be staying during their visit.

The delegates will be entertained by the city during their stay. They will be given a tour of the city and will participate in various social events.

The delegates will be leaving the city tomorrow morning for their eastern homes.

## TWO KILLED IN AUTO CRASH

Three Others Near Death, While Eight Are Less Seriously Hurt in Accidents

Two persons were killed, three probably mortally injured, and eight others slightly hurt in traffic accidents in and near Los Angeles yesterday.

The dead are George Weber, 6 years of age, and Ernest Adams, 7, both negroes, of Monrovia. They were in a car driven by John Wilson, a negro, of Monrovia, and containing also his son James Wilson, 8. They crossed the Pacific Electric tracks at Erwindale, near Monrovia, and the rear end of the car was struck by an outbound train in charge of Motorman J. W. McDonald.

The train was traveling about forty miles an hour, according to the Pacific Electric dispatcher. The two boys were in the rear seat and were killed. James Wilson suffered a broken arm and was taken to Covina Hospital. The driver was unhurt.

The seriously injured were Mrs. Bessie Galindo, 43 years of age, of 234 1-2 Leroy street, who made a collision with a car, and a woman, Hillman McKinnon, 21, of 1307 Arapahoe street, who suffered a concussion of the brain and possible skull fracture in an automobile collision. The driver of the car was unhurt.

The accident which may claim the life of McKinnon occurred at Washington and Main streets in a collision between a machine driven by Malcolm McCloud, furniture manufacturer of 331 West Forty-seventh place, who was slightly injured, and James Maloney, of 1444 West Fifty-sixth place, who was unhurt.

Mrs. Galindo was injured when an automobile in which she was riding swerved into a telephone pole and then crashed into a street lamp in the 3400 block on Whittier boulevard and turned over. Capt. Judson, the police chief, declared the machine went out of control because of a defective steering wheel.

Other occupants of the car received slight injuries.

## NUMBER OF EMPLOYED INCREASES

Several Industries Report 6 Per Cent Gain for June Over Preceding Month

Employment conditions throughout the State are on the increase, several industries showing a gain as high as 6 per cent for June over May, according to the California Labor Market Bulletin, which is issued monthly by the State Bureau of Labor Statistics. The average increase in employment for June over May was approximately 2 per cent. May also showed about a 2 per cent increase over April, the bulletin shows.

The largest gain in employment during June was reported for the chemical, oil and paint group of industries, showing a 6.6 per cent gain over the preceding month. The information from which the bulletin is compiled is received from 137 large industrial establishments, which employ 148,155 workers.

The average increase in employment for June over May was approximately 2 per cent. May also showed about a 2 per cent increase over April, the bulletin shows.

## NEW SCHOOLS COST MILLIONS

Quarters for 23,000 More Children Provided

Seventy-eight Buildings Are Under Way Here

Construction Being Rushed by 1831 Workmen

Quarters for 23,000 additional school children are being provided in buildings now under construction in Los Angeles. Seventy-eight new buildings, which will cost \$6,540,000, are under way and will be finished by January 1, next. The district has 1831 men now employed in school construction work, reports on file at the school board offices show.

All classes of schools are in the program. Some of the structures will relieve congestion, eliminate half-day sessions, and withdraw children from basement rooms, tenements and wooden buildings. Others will furnish additional facilities for school work—auditoriums, domestic art, science and machine shops, laboratories, music halls and cafeterias.

Hollywood and Lincoln high schools will begin the term in new domestic science buildings, the new James A. Garfield High School will be ready to receive 1800 students, and the Nathaniel A. Narbonne High School, with a like seating capacity, also will be ready by the opening date.

Among the additions to Junior high schools is a twelve-unit group at Hollenbeck. McKinley also will have a new science and a shop building.

San Fernando High School's new cafeteria, domestic science and the new building for mechanical arts building will not be completed until the latter part of October.

Virgil Junior High will celebrate the completion of the new auditorium early in November.

Work being pushed on elementary schools throughout the district, as the need for additional class rooms is more urgent in the grade schools than in the high schools. Hammett school will have a twelve-room addition ready for the opening of October, as will also Ninth street and Raymond avenue, while Barton Hill will have a new eight-room unit and Laguna street school will be ready to receive 400 students.

Eighty-seventh street's new twelve-unit building will be ready by September 1, as will the Graham elementary school. Gates street and Hollywood, both with twelve-room additions, also will be completed.

Hickman street, Leland street, Murdock street, Ninety-fifth street, Point Fermin, South car, avenue and Westwood will each have new buildings of twelve rooms. All of these will be finished by September.

Gardner street school will have a twelve-room unit ready for use by the first of October, and the addition to Fremont avenue will be finished a month later.

Figueras street's sixteen-unit building will not be completed until November, and Michelena's new classroom building will be ready about the same time.

Corcoran, Normandie avenue and Winnetka avenue, will have additions about the middle of October.

Included in the list of buildings to be finished between the middle of November and February 1, 1926, are: New Wilmington High School, and the new elementary school to be known as Wilmington Park. A six-unit addition to Wadsworth street, twelve rooms for Alameda street, and Alameda street, and Center street.

Mr. A. Edelson, Jr., High School is promised for February 15, with space for 1200 students. Manual Arts, new English hall, cafeteria and home economics building will be finished about February 1.

WILL HOUSE 1200  
The new Mount Vernon School will accommodate 1200 students when it is completed February 1. (Continued on Page 2, Column 5)

ISLAND OIL DREAMS FADE  
San Nicholas Reserved for Lighthouse, Ten Local Prospectors Told by Land Office

San Nicholas Island, ninety miles off the coast from Los Angeles, may have fossils, Indian burial grounds and implements of long-forgotten aboriginal tribes, but no oil and gas.

In so ruling, Land Commissioner William Spry of Washington, D. C., definitely dashed the hopes of Charles F. Carroll and nine others, the utmost depths of despair. Anyway, the channel island is reserved for lighthouse purposes by the War Department. Indian bones and trinkets. But the oil and gas signs intrigued Carroll.

So, he and those with him, ten in all, filed on more than 20,000 acres. The claims were rejected July 17, 1924, in a contest brought by the field division of the Land Office before Register Brainerd R. Smith in Los Angeles. Last week Commissioner Spry definitely settled the status of the claim.

Mr. Powell stated that he had been contemplating the Finance Committee, and during the present year hopes to expend by several hundred thousand dollars the \$1,000,000 unit expected of him.

PLACE OBTAINED  
FOR MEN'S CLUBNew Rooms, Like Old, Will  
be on Main StreetLocation at Present Being  
Kept SecretOrganization Known from  
Coast to Coast

Curiosity reigns among the picturesque characters wandering westward, parading philosophies, soldiers of fortune and others who compose the membership of the Los Angeles Men's Club on Main street, known from coast to coast and unique as the only organization of its kind in the world.

The question asked by all in the new clubhouse is to be located. For five years they have foregathered to read, argue, play checkers, take an occasional shower bath, trim their whiskers, exchange experiences and swap yarns in the old Turney Building. Now the lease has expired and the club must seek new quarters.

**NEW PLACE ON MAIN.**  
But a place is being prepared for them confides Maj. H. R. Carter, the manager. The City Playground Department has set aside \$16,000 for fitting up a new clubhouse right on "in street, for this club never could flourish anywhere but on the most colorful thoroughfare in town. The new building will be ready for occupancy within the next month or so, but the exact location will remain a secret until the opening day.

To the casual passer-by there is nothing intriguing in the dingy signs that mark the quarters of the L. A. Men's Club. A glance through the street door, which always stands hospitably open, reveals only rows of chairs occupied by men, most of them past middle age and undistinguished by sartorial elegance.

Entrance reveals walls lined with books whose bindings harmonize with the general appearance of the inmates, and chairs, useful for repose, but lacking in ornamental value. Nobody looks up to see who enters. Some of the occupants are intent on reading, others seem immersed in deep thought, while a few may be asleep. There is no conversation.

**MEMBERSHIP 200**  
There are three floors in all, which include reading and writing rooms, a gymnasium, shower bath, checker and billiard rooms, a reception room and a tiny private office. Newspapers and books are scattered around and there is an ample supply of cuspidors.

While a large part of the club membership, which averages about 200, is composed of middle-aged or elderly men who apparently have failed to take seriously the ancient adage about the rolling stones which gather no moss, there is also a considerable number from the ranks of the city's working men who gather in the evening. Most of these are young fellows who like to use the gymnasium or the pool tables.

Each member pays two-bit monthly. This entitles him to all privileges, including entertainment occasionally given in the gymnasium, which also serves as an auditorium, and gives him the right to shower baths, for which there is a charge of 10 cents. From these revenues the club is almost self-supporting, Maj. Carter says.

## PICKFORD CASE PLEA TODAY

Motion to Quash Indictments Against Accused in  
Kidnaping Plot to be Filed

An avalanche of legal motions is scheduled to be started on its way in Judge McLucas's court today immediately upon the completion of the State's case against Charles Z. Stevens, Claud Arthur Holcomb and Adrian James Wood, charged with a conspiracy to kidnap Mary Pickford and hold her for \$200,000 ransom.

The verbal and highly technical landmine will be loosened by the defense attorneys in an effort to strike out portions of testimony offered by the State's witnesses, and will be followed by a series of motions to dismiss the indictment against the individual defendants, and en masse. This was made certain by the many foundation objections made since the trial began by Public Defender Aggeler, Assistant Public Defender Vercoe and Attorney S. B. Hahn and John A. Holland of the defense.

**SEE HOPE FOR WOOD**  
The defense feels that the case against Wood, the youngest of the three defendants, is the weakest of the three. Wood was driving an oil truck at the time the police say the kidnaping plot was hatched about to be consummated. The run he is charged with buying for the crime was made at the time of his arrest, should the motion to dismiss the case against Wood be granted. He was automatically would go out of the case, the defense attorneys say.

Today's said to be devoted principally to the reading into the record of the confessions made by the three defendants to the police. Dep. Dist. Atty. Mc-

## RUSSIAN-RUM-ROCK-REMORSE

A Nickel's a Nickel—But Three Pop Bottles are Something  
Else Again; so Humatoff Heaves His Heaviest  
and Innocent Bystander Bears the Brunt

A nickel is only 5 cents in the United States, but in Russia it is 25,000,000,000,000,000 rubles, and worth bothering about.

This was the chain of reasoning the police reconstructed last night for why Mrs. Madeline Moreno, 31 years of age, of 1629 East Third street, was in general hospital with her leg broken in two places, and Bill Humatoff of 1414 1/2 South Pleasant avenue, former subject of the case, was in jail charged with intoxication.

The husband of Mrs. Moreno, whose name the police did not bother getting, runs a soft-drink stand and charges 5 cents deposit on each bottle taken out by customers.

**WIELDS TWO-BY-FOUR**  
With these preliminaries, the story may now proceed. Humatoff, according to the police, appeared at the stand with three empty bottles and demanded 15 cents.

"One of these bottles is broken," Moreno objected. "I can't take that order," Humatoff retorted, or words to that effect.

This started a debate that went on vigorously until Moreno reached for a piece of two-by-four standing behind under his counter for emergencies and clouted Humatoff on the head with it.

**INNOCENT BYSTANDER**  
Humatoff, not to be outdone, seized a young boulder from some place at other and hurled it at Moreno. Moreno ducked. But Mrs. Moreno, standing in the rear of the stand as far

MAN BEATEN BY  
THUGS MAY DIEFound Unconscious With  
Skull CrushedFootpads Wage Two Vicious  
Hold-up AttacksLumber Dealer Felled With  
Blackjack Blow

Two men bludgeoned by footpads, one of whom probably will die, and several other robberies and hold-ups, were noted in police records yesterday. Manuel Arillo, 45 years of age, was the most seriously injured victim. He was found unconscious from a baseball fracture at Castelar and third streets early yesterday, his pockets turned inside out.

At Receiving Hospital, where he was taken by Detective Lieutenant Hamilton, surgeons said he probably had been struck with a brick or sharp stone, rather than a blackjack. He was removed to Receiving Hospital, still unconscious. His death is expected. Officers said he seemed to have been struck down from behind and probably never realized what had happened to him.

The other man beaten by footpads was Frank H. Fox, a lumber merchant, of 214 Halstead avenue. Two men, one armed with a revolver, the other with a blackjack, accosted him near his home shortly after midnight and commanded him to throw up his pockets. Fox refused, and was struck with the blackjack.

Another hold-up victim was J. Blumenschel, a salesman living at 311 North Beaudry avenue. At Thirty-ninth street and University avenue, two men held him up, robbing him of \$19 and his watch and chain.

CAPTURED IN  
CHASE DOWN  
TEN FLOORSFugitive Arrested After  
Leading Officer Through  
Downtown Hotel

A chase through ten floors of stairways, halls and corridors in a downtown hotel resulted early yesterday in the capture of Thomas H. Rogers, 33 years of age, of 514 Westlake avenue, by H. R. Hatfield, hotel special officer. Rogers fled from the hotel after being charged with the murder of a woman.

According to Hatfield, he encountered Rogers on the tenth floor of the hotel and started to run. Rogers, keeping to the stairways, led him on a chase that ended in the special officer's final overtook Rogers and he finally overtook Rogers and he finally overtook Rogers and he finally overtook Rogers.

Rogers said he had gone to visit C. A. Griffin, assistant manager of the Hotel Sereno, on the eleventh floor. Griffin said, according to the officer, Rogers had been in the hotel for some time and had no particular business with him.

Amador Fight  
in Chaplin Case  
Starts Friday

The court battle over the costume employed by Charles Chaplin in motion pictures is scheduled to be resumed next Friday before Judge Shaw, when attorneys for Charles Amador, a screen actor, and the Western Feature Productions, will seek to have set aside the decision recently handed down by Judge Hudson granting Chaplin an injunction restraining Amador from using the "Tramp" character in his motion pictures.

Amador's attorneys, Ben Goldman and J. J. Lieberman, attacked the injunction on the ground it was not justified by evidence adduced at the trial of the case, and also on the theory that the judgment is ambiguous and does not set forth clearly what might be considered an imitation of Chaplin's screen personality.

An amended motion to set aside the injunction was filed yesterday by Amador's counsel, who stated they want the court to determine definitely what sort of protection Chaplin is entitled to by the judgment. Attorneys for Amador contend the public would be misled if Amador and his associates should produce pictures advertising and labeling as productions featuring Amador.

Charged with selling worthless stock after representing it to be recommended by several local financial houses, Bernard Dunn and H. M. McChesney today will appear before Judge Ketcher for trial.

Dep. Dist. Atty. Jordan and Verba, who will prosecute the two, expect to call more than a dozen witnesses to tell of the asserted glowing terms the men used in describing their stock.

According to previous testimony, Dunn and McChesney sold stock to the Acceptance Corporation at many times what it was worth. They told purchasers that many of the men were interested, that the company was assured of a glowing future and that the stock would be worth much more than the purchase price.

There are six counts in the charge. The total amount of money turned over in the scheme is believed to be in the neighborhood of \$50,000.

CITY BOARD  
TO CONDUCT  
FRAUD QUIZSierra Madre Water Head  
Faces Charge of Misusing  
Funds and Property

By a "Times" Staff Correspondent

SIERRA MADRE, Aug. 2.—Charges of misappropriation of funds and property against Thomas Henderson, water commissioner and superintendent of one of Sierra Madre's pioneers, will be heard before the Board of City Trustees Tuesday evening. The charges are denied vigorously by Henderson, who declares he can clear himself completely. They have caused considerable stir in Sierra Madre because of Henderson's prominence in civic affairs.

Louis Dietz, City Clerk and Auditor of the water board, made the charges in an official communication to the city board Friday night. He asserts that Henderson sold property of the water department without accounting for the money or turning it over to the city; that he appropriated to his use electric and gas bills of the city; and that he charged personal telephone bills to the city. The trustees filed the charges and called a hearing.

LIFE HINGES  
ON TALES IN  
DEATH CASEPair Accused of Murder  
Must Convince Jury as to  
Which Tells Truth

Involved in a situation as fantastic as the plight of Scheherazade and Lai Lung, story tellers of classic history, two men today will tell a modern tale. A jury, sitting over as sultans and mandarins with life and death in their hands, must order the losing teller to the noose.

The two story-tellers are Willie Adams and Alfonso Rincon. They are accused of the murder of T. C. Ullman, 33 years of age, who was found dead in a rooming house, whose body was found in a well on his ranch. Each on the witness stand has insisted that he was present only under fear of his life, that the other dealt the blow that cost Ullman his life. Each says that the other threatened him with the same death if he made a move to aid Ullman or to bring the case to a court.

The case will be given to the jury today. They will be asked to decide between the stories and find the guilty man. Dep. Dist. Atty. Davis and Costello, who might be called to the witness stand, will testify against the pair. Scheherazade, will ask that both the tellers be hanged, for both lives be taken as a forfeit.

NEW SCHOOLS  
COST MILLIONS

(Continued from First Page)

Roosevelt High's new classroom, gymnasium and shop addition will be finished the middle of January, and the Robert Louis Stevenson elementary school will be ready for occupancy about the same time.

Thirty-eight street, Toland Way and Vernon avenue, comprised of twelve classrooms each, will be finished by November. Tenth street, Sixty-sixth street, and Vine street, Sixty-sixth street, and San Rafael will have new buildings completed early in December.

Franklin High School's large addition of twenty-two classrooms and gymnasium and shop addition will be completed by October 15, but the alterations to the main building will be completed before school opens.

## READY IN SEPTEMBER

The new building on the Ebelman street and containing sixteen rooms, also the new McKinley Home and the Ivanhoe will be ready by the middle of September.

Miramonte, Loreto street, Paducah street, the Budlong Agricultural school and the new cultural center will all be finished September 1.

Twenty-third street's new four-teen-room addition will be completed November 15. Forty-second street's new addition of twenty-two classrooms and shop addition will be completed December 29, and the Gulf avenue school, March 3, 1926.

Many of the new schools will have bungalows to accommodate kindergarten, manual training, or other classes.

Couple Honored  
on Fiftieth Year  
of Wedded Life

Joseph Kaiser, 75 years of age, retired Chicago police officer, and his wife, Mrs. Helen Kaiser, 69, celebrated their golden wedding anniversary last night by giving a dinner to forty friends.

The celebration took place at the Kaiser home, 1305 June street, Hollywood, where the couple have lived since they came to California three years ago.

The only relatives present were a son, Joseph Kaiser, Jr., a local electrician, and his two daughters, Rowena and Bernice Kaiser.

NEGRO ROBS SERVICE  
STATION AND ESCAPES

A negro, unmarked and carrying a large pistol last night entered an independent oil station at 1256 Vine street, backed the attendant, F. W. Douglas, into a corner and fled the cash register of \$40, according to a report made to the Hollywood police.

The negro, who was charged south on Vine street. The man's description, according to police, tallied with that of a negro implicated in numerous oil-station robberies.

RAID EXCLUSIVE  
FILM CITY CAFEScreen Stars Celebrating Fete  
InterruptedMontmartre Cafe Invaded,  
Two JailedCars Seized in Clean-Up Over  
County

Hollywood night-life cafes were the objectives of liquor raiders last Saturday night by members of the police vice division under orders of Inspector Davis. The places visited by the raiders were the Montmartre Cafe, 4787 Hollywood Boulevard, and the Greenwich Village Cafe, across the street.

At the same time deputy sheriffs under Capt. Bond raided the Ace of Hearts Cafe, northeast of Culver City's roadside resorts. Only a few arrests were made, the raiders failing to find much liquor on the premises, they reported.

Several parties of film celebrities gathered at the Montmartre on the occasion of the inauguration of Greater Movie Season were unimpaired when a police search failed to find any liquor in their possession.

## TWO ARRESTED

Only two persons were arrested there. They gave their names as A. E. Doty, 1535 Santa Barbara avenue, and Harry Kennedy of Fullerton. Both were booked at Central Station on Wright Act charges.

The police raiders next broke in on a merry scene at the Greenwich Village Cafe, where they took into custody William J. Cornell of 1550 La Brea avenue, and Charles McNulty of 1532 West Twenty-second street, when liquor was found, the officers say, at their tables.

In Culver City the officers arrested Frank Swallow and Charles Grimm on charges of transportation sale and possession of liquor, confiscating two cars. Fred R. Lee, also of Culver City, lost his car.

In West Hollywood Fred Morris and Fred Smith were arrested for same offenses. Pete Metzler, also caught in West Hollywood, also was taken into custody. Wally Stewart in the same vicinity, lost their car.

**RAID BELVEDERE**  
In Belvedere, the officers, assisted by Deputy Constable Parde, arrested Albert Rawlings and took his car, a 1924 Ford, and Paul H. Stein, who also lost their car. L. W. Neale was arrested also in West Hollywood.

At Venice Mrs. Mateo Ferrari was arrested on sale and possession charges, and Mr. and Mrs. Tony Divola were arrested for same offenses. The officers destroyed 300 gallons of wine, said to have belonged to the latter couple.

In the Jintown gambling raid, George Garner was arrested for sale and possession of liquor, and the officers said. All the prisoners were directed to appear before Justice Wilson at El Monte.

CHEMISTS GIVEN  
WARM GREETING

(Continued from First Page)

and Payne, the scientists and their wives were taken by automobile to Corona, through beautiful Magnolia Drive, with its towering eucalyptus and paper trees, a journey that was pure delight every foot of the way to the eastern men and women.

At Corona the orange groves of Jameson's Southland Ranch were "treble centers. Men of scientific bent from New York and Chicago, even from far-distant Canada, stormed the groves and plucked the trees with "samples. An exhibition of the latest methods used in disinfecting orange trees with hydrocyanic acid also was watched with keenest interest by the chemists who know the secret of the process thoroughly, but who had never before seen it in actual operation.

The visit to the orange groves completed the opening Southern California welcome to the distinguished visitors. Soon afterward they boarded the special train and continued their journey into Los Angeles, where a larger committee of local members of the society was waiting to greet them at the Biltmore.

Among the men whose names are linked with American chemical history who arrived here yesterday were Dr. James P. Norris, of the Massachusetts Institute of Technology, president of the American Chemical Society; Dr. Charles L. Parsons of Washington, a national authority on nitrogen; Dr. Harry E. Barnard of Chicago, noted expert on pure food and drugs; Dr. George D. Rosenbarten of Philadelphia and Dr. Howe.

## INDUSTRIAL DIVISION

In addition to these, industrial chemistry was represented by such famous names as R. Norris Shreve of New York; Dr. C. Dyer of New York; Dr. A. T. Larson of Wilmington, Del.; F. Ziegler of Chicago; Oswald Schirmer of Washington, D. C.; Harvey Silliman of New York; Joseph Vetter of Hackensack, N. J.; and C. Whistler of Pittsburgh.

Many of the great universities and colleges of the nation, in whose chemical laboratories have been born ideas of tremendous commercial value, also were represented. G. A. Hulet of Princeton, N. J., was among the visitors.

The United States government had its representatives also, among them being Dr. Atherton Seidel of the Hygienic Laboratory, and Dr. W. W. Skinner of the United States Bureau of Chemistry. Canada also was "on the job," with Victor Kilmer of Ottawa and A. C. Grubb of Saskatoon.

**WOMEN ALSO PRESENT**  
The men did not "hog" the limelight, for in the party were many women who have contributed highly to the sum total of chemical knowledge. Among them might be mentioned Miss Lillian Cohen,

## TO COMBAT LAWLESSNESS

Ever since the Bolshevik revolution of 1917 criminal organizations have been conducting a crusade against the government and industries of the United States. In their ranks are enlisted open and secret enemies of law and order; and they point to increased lawlessness since 1917 as proof that the lawless are making progress in defying and nullifying the prohibitions of the law. They hold that capitalism is protected and made possible by the law and that they can win their war against capital only when they have first overcome the restrictions that law has placed on society.

Disregard for the law, advocated under the pretext that such action is necessary to establish the dictatorship of the proletariat, has produced the inevitable effect of increased lawlessness. Those criminally inclined grasp avidly at this pretext as an excuse for senseless crimes of violence. They condemn the moral turpitude by quoting the declaration of the leaders of the Third International that "Any means are permissible to accomplish our desired end."

But there are men in this country who hold that murder and pillage do not cease to be murder and pillage when committed in the name of Communism. They refuse to accept the theory of government—or, rather, absence of government—that permits one to take from another his own, that condones deeds of violence, that mocks virtue and panders to vice.

Men and women in different sections of the country holding these views are starting in turn a crusade against criminals and lawlessness. They purpose a nation-wide organization to aid in a stricter enforcement of the law, to pursue criminals more vigorously, to strengthen law criminal codes, to speed up criminal procedure and make those who refuse to respect or observe the law pay the penalty for their violations.

The proposed name for the new organization is the National Crime Commission. A preliminary meeting was held in New York last Thursday, attended by leading jurists, legislators, police officials, district attorneys and representatives of civic and mercantile organizations. Some of the speakers asserted that the increased activities of criminals and criminal organizations "have made life and property more unsafe in the United States than in any other civilized nation."

The work of the Crime Commission will be in a large measure educational. The committee will seek to co-operate with the municipal, State and Federal departments in revising the criminal code. They will conduct a nation-wide study of crimes of violence and make recommendations for the most effective methods of prevention or punishment.

Where disregard for the law exists disregard for violations of the law inevitably follow. It is unfortunate that there are in this country at the present time possibly millions of aliens who, through ignorance or malice, regard violation of the law as an achievement. They have not yet learned the necessity for the restrictions which the Federal government, the States and the municipalities place upon the acts of individuals. Our restrictive immigration laws and the progress made in teaching these foreigners the fundamentals of Americanism are steadily decreasing the proportionate number of these actual or potential law-breakers. But there are also thousands of the American-born who commit crimes of violence because they would rather live through pillage than by honest labor.

These classes represent but a small minority of the population of the country; but they are very active in some sections and their activities occasion the increase of lawlessness. And there are others who have learned the lesson of lawlessness. Education is increasing in this country and lawlessness also. Is it possible that our system of education has been perverted until instead of building character a race of educated ignoramus is reaching its maturity? Perhaps too much attention is paid to the fine and applied arts and too little to the art of becoming a good citizen.

**WIDOWS WEEDS**  
 The women of Wisconsin seem to regard Mrs. La Follette, widow of the late Senator, as a suitable person to represent the State in Washington, though the widow herself has no such ambitions.

On June 29 Mrs. Rogers, militant widow of the late J. J. Rogers of Massachusetts, was chosen to occupy her husband's seat in Congress. She defeated her nearest rival, Gov. Foss, Democratic candidate, nearly three to one.

Already two women from California, Mrs. Mae Nolan and Mrs. Julius Kahn, are in Washington completing the lawmaking begun by their illustrious husbands.

Mrs. Winnifred Mason Huck, daughter of Congressman Mason of Illinois, was in direct line of succession of her father and is now wearing his toga. It seems to fit perfectly.

Mrs. Ross of Wyoming sits in the Governor's chair formerly occupied by her husband, Mrs. Ferguson of Texas did not wait for her spouse to die.

Are we starting a new succession of office? Are we to have families who shall occupy position by right of marriage? Will there be an heir-apparent to the Presidency in time?

Is it just sentiment? Can it be a contagion? Have there been too many real power behind the throne? Did they make their husbands?

## It Looks as if There Would Be a Rescue

(Parodied by George Matthew Adams.)

## SAN DIEGO'S GROWTH

An increase of over 5,000,000 gallons of water a day in the supply now available by the people of San Diego indicates the growth of that beautiful Southland city. Work has been started on a pipe line to utilize the surplus water of the San Diego River at El Capitan, where it will be diverted by a dam and then flow down to the city through a conduit to cost about \$1,000,000. It is expected that the line will be finished and the water running into San Diego in six months.

It has been part of the history of most of our Southern California towns that they have had to deal materially to their water supply during the past ten years as the result of greatly increased population. Aside from the naturally magnetic properties of Los Angeles, this has been one reason why so many lesser municipalities have sought annexation to this city, though Los Angeles, in the United States, is the only city that is unable for the present to annex many more small communities because of its own requirements.

Aside from the necessary increase in her water supply, San Diego's growth is well illustrated by the building activity since 1919. That year the total volume of building represented \$2,800,000. In 1920 the total was \$3,840,000. In 1921 it jumped to \$5,250,000 and it has been adding over \$1,000,000 in new structures each year since that time. Home building, one of the best indications of progress in any city, has increased during the past two years at the average rate of 175 new residences monthly, while the neighboring communities of Coronado, La Jolla, National City and Chula Vista have taken great strides.

The Federal census of 1920 gave San Diego a population of 74,643, as compared with the 1910 figures of 39,578, which is a pretty healthy growth in ten years and is fairly illustrative of municipal expansion in Southern California. The indicated population, based on the latest city directory, is over 125,000. The present rate of increase tends to show that by 1930 San Diego will have a population of about 200,000, or nearly that of Atlanta, Ga., and not very far behind Oakland's present figure.

One of San Diego's greatest attractions is the number of fine beaches close to the city. During the past year the demand for home sites along the ocean front from Ocean Beach to La Jolla and beyond has assumed tremendous proportions. The new population along those beaches, as well as on the San Diego highlands, has added much to the business prosperity of the city, and a still greater growth should come during the next few years. Another aid has been the expenditure of over \$20,000,000 by the Federal government in pursuance of its plan to make that port one of the chief naval bases of this country. If President Coolidge approves the plan of Secretary Wilbur San Diego will become the great arsenal of the nation.

All in all, the splendid progress of San Diego is, indeed, inspiring to those who have the interests of Southern California at heart. Here, where he set up the cross and established the first of the California missions, Father Junipero Serra, could behold the place today, would be amazed at the spectacle civilization has wrought since his crude beginning a century and a half ago.

**NOW VERY CLEAR**  
 It is now beginning to be very clear why several European governments are ready to talk business regarding debt settlement. They want to float new loans in the United States.

**NO EXPLANATION NEEDED**  
 If the stories about Mrs. Jack Dempsey's shopping tours in Paris are true no explanation is needed for Jack's decision to re-enter the ring.

The astronomer tells us that a dozen or more stars blow up every year. This explains those funny noises out Hollywood way.

Just About It  
James J. Montague

## IT OUGHT TO BE EASY

I have known many gents who with effort intense, Not to mention the drain on their health, Have spent all their lives in a series of drives To gather in codices of wealth; And they've often asked aid, in the raids that they made On the dollars that lay around loose, From people like me, and receiving it, free— Have hastened to put it to use.

When a man on the make he is willing to take Any tips he can possibly get, That will help him add more to his fast-growing store, Or to win any soft-looking bet, But it's seldom we find that a chap of this kind Who a fortune has finally won, Invites in his friends when his income he spends; To help while the spending is done.

But now comes a man who is seeking a plan To scatter his millions around, And he says to succeed he is sure he will need All the help that there is to be found, The amount he's amassed is so terribly vast— Such an overgrown mountain of gold— That the old fellow fears in his last closing years That he never can spend it himself.

Well, the problem is hard, but we know of a hard Who can show him just what he can do, To dispose right away, in a snappy, today, With, we might say, a million or so. And, as for the rest, he need only request For our aid, and we'll put on our hat And seek to and fro for some folks that we know— Who gladly will help him spend that!

(Copyright, 1925, by the Bell Syndicate, Inc.)

## TRYING TO TRY A LEPER

Five years ago George Beaupaire, a Louisiana leper, supposedly killed his wife and the prosecuting officers are still trying to hale him into court. The trouble is that lepers, to all intents and purposes, are legally dead, and corpses cannot commit crimes. Moreover, the leper cannot be tried out of court and the law does not permit his presence in a public place. It would take a Philadelphia lawyer to unravel the legal technicalities involved in this peculiar case.

**MODERN PROGRESS**  
 For the sum of \$2.50 a passenger aboard a Pacific liner was able to conduct a lengthy conversation with her sister, who was traveling upon another ship. No difficulty was experienced in enjoying the talk. Many of us can remember when the public telephone was a novelty. Yet within a single lifetime it may easily be that this wonderful invention will become antiquated. Human curiosity refuses to be satisfied.

**THE BILL OF FARE**  
 California is spending about \$12 a year per capita on its various schools. In Tennessee the expenditure per annum is less than \$5. It is not expected that evolution could be served with a \$5 course.

**SLOW MOTION**  
 In a geographical way the island of Japan may be moving eastward, but it will be a long time before it obscures the view of Catalina.

## FOUNDATION OF FAITH

BY J. J. KOWMAN

Many of us are known as forgotten men. But, even so, our faith in God is elemental and we are uneasy until we find Him. Our faith is still to be said: "For the Athenians and strangers were there spent their time in nothing else but either to tell or to hear some new thing."

It seems to me that truth is the most invisible thing in existence today, certain braggadocho professions to the contrary notwithstanding. Truth is hidden, and mighty few people want to discover it. They are afraid they will be forced to permanently abandon their pet prejudices, and that is just what most people fear most of all. They love their prejudices and they want to keep them. They are not unwilling to rearrange them occasionally, but to reject all of them—discard them as truth would require them to do, if they discover truth in its hiding—that is precisely what they do not want to do.

There is as much truth as there ever was; and it is as potent as it ever was. It certainly would, if embraced, rid the world of its intolerance and prejudice and make all mankind closely akin, also deeply sympathetic and altogether decent.

This, I think, is the reason that some people are not searching for truth. And truth is the great emancipator. On all sides of us we hear people denying God. It is a little as if the planets should proclaim that there is no such thing as space, or as if the rivers should declare that there is no ocean. We cannot lay our hands on life anywhere without feeling the thrill of that something more which underlies all laws and eludes all physical analysis.

Who is there to deny that under the materialism, selfishness, rivalry and greed of the human race there is not a soul? Every day of our life we desire to be of service. Love frequently prompts this desire. No prospect, no addition, no instruction is so effective in making people happy as doing deeds of kindness, giving a word of cheer, a smile of sympathy, a word of encouragement, a word of consolation. Without love, no matter how expended, what a desolate old world this would be!

In this life of ours, a man or a woman must either retrograde or progress. Life is not a mere fact of being, but a process of becoming. As I grow older I am firmly convinced that God is in us and everything that surrounds us, and that with its sustaining influence, always apparently dying, yet always being infinitely renewed. It is this immensity that astounds us with its greatness, and that cannot be realized in our minds. It is matter that lives, animated by the force that dwells in it, with absolute unity, without separation or duality. This is God, and the world is God also.

I firmly believe in God. Life would be a very happy thing without such belief. I believe in a Supreme Being, because the facts of life and the world harmonize in my mind with that assumption. In the United States, I believe in the American people, because they are the most dangerous enemies American liberty and culture have ever known. There is unquestionably a pathological condition of their minds. They are aided and abetted by the character of their audiences, brought together out of the ten million Americans who have never learned to write an intelligent letter, and the twenty million Americans who do not comprehend the nature of free government, and the half of the State legislators who never get beyond the grammar school. Any time these men back their logic with their oratory, science, years of study and thought lies in ruins on the lecture platform. These men are dangerous.

Recently, stood alone at the "Rim of the World" here in California. Around me were vast empty spaces. All was silent, immutable as a tomb, scornful of man and his petty troubles. This place of vast distances was inspiring and at the same time most menacing. Not a sign of habitation, not a sound of a human voice.

As I attempted to peer into the vast spaces there was something that gripped my heart. I stood entranced by the sublime and majestic beauty of it all. A mighty wild arose and great clouds were called across the sky to the sending of a swift alarm. Before this wild the waters were tumbled far and wide like tea saucers, and a rainbow that arched the whole was demolished into nothingness, only to be kindled again as a flame in the whirlwind breath of the riotous air. Only moment the atmosphere was a fairy garden of clouds. The next, some giant hand reached forth and plucked and bore them away. There were few questions that beat upon the soul with such vociferous clamor as the great silences.

Forever were doubts and fears. Into my soul there crept a sweet and peaceful harmony and I cried out that I cared not for dogmas or theological problems, but knew in my heart of hearts there was a God.

**THE WIFE CALLS**  
 "I'm sorry to disturb you, honey, but Willie cut his finger and I wondered if you thought there would be danger of blood poisoning. He was playing in the sedan and knocked the windows out with his hammer."

"I'm sorry to break in on your work, dear, but I thought I'd come downtown and have lunch with you and see if I could pick up something in the way of a hat. Now just say so if it isn't convenient."—McCredy Huston in Life.

**WALT DISNEY**  
 We have to move to Indiana gradually in order to attain a status where she will abandon her present position of using motorized crime and the use of ovens as a business card.

## The Woman and Her Job

BY VALERIE WATROUS

(Questions concerning the problems of women will be answered in this column if addressed to Mrs. Watrous at The Times.)

### WHEN YOU KNOW YOU'RE RIGHT

Independence is an asset, although we have it on good authority that the most shall inherit the earth. Molly's manner is demure, but there's a tilt to her chin. When the cash was short she'd grab her hat and dash off down the street. And Arthur would dash after her and bring her back. When Arthur sold the picture show he had become so accustomed to these storms he was lonesome. He sent for Molly and began training her to write publicity. Not that he knew much about it, but neither did she either. Presently the little cashier struck her gait and developed a talent for treat publicity. She has started many fads in advertising that have been copied by high-spirited publicity agents. Not only does she think of unusual "stunts," but she has learned to write live news stories press-agency her clients.

But she's meek and lowly no longer. When Arthur runs off at a tangent she stops him in no uncertain manner. If there are tears shed they fall from her eyes, not hers. "I've been the best thing she ever had, and just see how she treats me," he declares sorrowfully.

"Don't best friend me," Molly exclaims hotly. "I'm right, and you know it." And that's her whole secret, for she has cast out fear and goes ahead indifferent to criticism.

### ANSWERS TO QUESTIONS

My dear Mrs. Jones: If you've had experience as a central and long-distance operator why not go to the telephone company and ask for a job? I suppose the automatic phones have cut down the number of girls employed, but why ask me? Only the company can answer your questions.

Dear Miss C.: No correspondence course can ever take the place of actual experience in a tea room. Why not make the rounds and ask to be taken on as an apprentice or understudy? After spending a year at work in a tea room you will take the course you mention if you think you need it. But don't take it with the intention of the school will provide you with a managerial position.

The battle was on. Black clouds shot through the lightning and shadowed the ticket box. Molly and Arthur had a row every few days. She developed the quitting

habit. When the cash was short she'd grab her hat and dash off down the street. And Arthur would dash after her and bring her back. When Arthur sold the picture show he had become so accustomed to these storms he was lonesome. He sent for Molly and began training her to write publicity. Not that he knew much about it, but neither did she either. Presently the little cashier struck her gait and developed a talent for treat publicity. She has started many fads in advertising that have been copied by high-spirited publicity agents. Not only does she think of unusual "stunts," but she has learned to write live news stories press-agency her clients.

Along about then she acquired that tilt to her chin. She called down Arthur into the kitchen and laid down the law. If he ever touched her cash drawer again while she was looking, or when she wasn't.

## SOCIETY

BY JUANA NEAL LEVY

Mrs. Raymond Hunterberger, formerly Miss Elinor Renick Warren, whose wedding was one of the brilliant events of June and who has just returned from her wedding trip, was the honor guest at a charmingly arranged tea, with which Mrs. Lawrence Tibbitts, the Ambassador, the hours being from 4 to 6 o'clock.

The table was exquisite in its decorations of yellow roses and lavender sweet peas. The guests were arranged for the hostess, honor guest, and Mrs. Bruce Hay Chapman, Mrs. Herbert Booth, Mrs. Stoddard Atwood, Miss Helen Solenberg, Miss Jane Walker, Mrs. Charles R. Jones, Mrs. Conrad Nagel, Miss Julianne Johnson, Mrs. Milton Sills, Mrs. Sidney Franklin, Mrs. Arthur Hays Sulzberger, Mrs. Thomas Tyler Robinson, Mrs. Lucy Katcher, Miss Lydia Katcher and Mrs. Arthur Miller.

Mr. and Mrs. Tibbitts are enjoying the summer in Los Angeles. They were taken to the 5131 Marmont Lane, Hollywood.

Visiting Here  
Mrs. Frank Edwards Bernsen, who before her marriage a year ago was Miss Grace Wilson, has come up from her home in Tulsa, Okla., to visit her father, Charles R. Wilson at his home in Wellington Road, Mr. Bernsen will join his wife here later. Many delightful affairs are being planned in honor of the visitor who has a host of friends in Los Angeles and vicinity.

Home Again  
Mr. and Mrs. Walter Robley Simons of 281 South Placentia avenue have just returned from a six-weeks' tour of Alaska. Their travels took them to the Arctic Circle, the Yukon, the Kuskokwim, and most outposts of civilization into the region above the Arctic Circle. The Simons family is now in the city of Los Angeles, where they are in Plymouth Boulevard, preparatory to opening their beach home, "The West-End," next week at Balboa.

Mr. and Mrs. Simons are planning to entertain as houseguests John Bates and her attractive granddaughter who are coming from Peru, South America, to guests at the home of Mr. and Mrs. Chester Wallace Brown at their home at work in a tea room you will take the course you mention if you think you need it. But don't take it with the intention of the school will provide you with a managerial position.

Home Guests  
Mr. and Mrs. Alva E. Green of Normandie avenue are entertaining as their house guests Mrs. Audrey Bear, Mrs. Sorel, Mrs. Green, Mrs. Sorel, Mrs. Bear and Mrs. Sorel.

Delightful Affairs  
Announcing her engagement to Spencer Shannon of Baxton, Pa., Miss Katherine Wallace, entertained at a luncheon at the home of her parents, Mr. and Mrs. A. J. Wallace in Camino Palmero, Hollywood, last week.

Miss Wallace is a daughter of the late Mrs. Sarah Shannon, who was a well-known actress. Miss Shannon and Miss Wallace were both graduated last June from the University of California at Berkeley.

Following the luncheon a number of intimate friends of the hostess were called in informally to tea and told of the engagement.

At Luncheon  
Miss Ella Brooks Soland, who is making the Ambassador her headquarters this summer, entertained Thursday afternoon with a charmingly appointed luncheon in the Louis XV Room, covers being arranged for thirty-five guests.

Engagement Announced  
Mrs. Laura G. Parkins of 2111 West Twenty-ninth Place has announced the engagement of her daughter, Miss Dorothy Jane Parkins, to Clarence W. Fetterman of Alhambra, the news being told at a party given at the home of Miss Parkins' chum, Mrs. Robert H. Beekman, (Laura G. Parkins) 412 1/2 North Hollywood, Wednesday afternoon.

The table was beautifully decorated in shades of peach and orchid, summer flowers being combined with ferns, the place cards and favors carrying out the same color scheme and tiny golden slippers with the names of the betrothed announcing the engagement. No date is set as yet for the wedding.

Charming Tea  
Alfred Mirovitch, the distinguished Russian pianist, who is making his home in Beverly Hills this summer, entertained with a delightful tea Wednesday afternoon at his home, 412 1/2 North Hollywood, with Mrs. Joseph J. Carter, Mrs. Mercedes Rucker, Mr. and Mrs. Fritz Reinhold, Mr. and Mrs. Yestman Griffith, Miss Ethel Legniska, Miss Melville Linslie, Mr. Howard Hansen, Mr. and Mrs. Cecil Arden, Miss Cecil Arden, Mrs. Carrie Jacobs Bond, Miss Lenore Griffith, Miss Mollie Merrick and Fritz Lyons.

Announcement  
Announcement is made by Mr. and Mrs. E. L. McIntire of Burbank of the marriage of the late Mrs. E. L. McIntire, who was having been inducted into the Hollywood Heights Church, Monday, July 27, at high noon. Rev. Bodkin officiating. Both Mr. and Mrs. Shear are graduates from Hollywood High School and will make their future home in Huntington Park.

Home Again  
Mrs. S. A. Rothamel of 413 South Van Ness avenue and her

## CHEF WYMAN'S Suggestions

### TOMORROW'S MENU

Breakfast  
Cantaloupes  
Coddled Eggs  
Toasted Milk  
Luscious  
Honey Avocado Salad  
Cheese Biscuits  
Fresh Plum Pie  
Iced Tea

Dinner  
Fruit Cocktail  
Olives  
Stuffed Round Steak  
Green Beans  
Hashed Brown Potatoes  
Sliced Tomatoes  
French Dressing  
Peach Flan

Peel and chop fine four quarts of the red rhubarb, place in a preserving kettle with the grated rind and chopped pulp of three oranges, the grated rind and chopped pulp of one lemon, one pound of sugar, and a quart of water. Boil for three hours.

HEWES SALAD  
Peel a pound of avocado, cut in strips and cut the strips in dice; place the avocado dice in a bowl that has been rubbed with a clove of crushed garlic and mix with one-half cup of olive oil, two-thirds of a cup of lemon juice, and a dash of salt. Add two-thirds of a cup of finely chopped parsley and serve.

CREPES  
Sift one and a half cups of sifted flour with three level tea-

spoonfuls of baking powder, one teaspoonful of sugar, and one-third of a teaspoonful of salt. Rub into these two and a half table-spoonfuls of butter and three-quarters of a cup of grated American cheese. When like coarse meal work to a smooth dough with half a cup of milk. Pat out half an inch in thickness, place half an inch apart on a buttered baking sheet and bake in a moderate oven twelve minutes.

STUFFED STEAK  
Have the butcher cut a one-inch slice from the full round of beef, lay on a board, sprinkle over one cupful of dry bread crumbs mixed with one cupful of chopped beef, one tablespoonful of chopped onion, one tablespoonful of chopped parsley, and a half a teaspoonful of paprika; roll up tight and tie with strong string. Cook in a pot of boiling water until nicely browned on all sides. Add boiling water to nearly cover the steak, cover the pot tight and simmer slowly for three hours. Remove the steak to a hot platter, add two tablespoonfuls of sprinkled parsley and a dash of salt, and pour over the steak.

PEACH FLAN  
Sift one-third of a cupful of sifted flour with one cupful of sugar and one-quarter of a teaspoonful of nutmeg; rub into these four tablespoonfuls of butter. Line a deep pie pan with a short pie pastry, sprinkle over the bottom half of the flour and sugar mixture, cover with peeled, stoned and halved peaches, cut side down. Add the remaining sugar and flour mixture and bake thirty minutes in a hot oven.

MAN THE DREAMER  
Woman is the More Logical Thinker, Brooklyn Artist Asserts

Man is a hopeless idealist and an uncontrollable dreamer, while woman is the concrete, logical thinker, in the opinion of Leon Dabo, Brooklyn artist. He expressed what he himself called the heretic opinion at the annual dinner of the Plymouth Athletic Association this morning.

The popular conception that woman is a tender, mystic being is a mistaken one, he asserted. On the contrary, he said, she is a realist who never loses or changes her mind in any situation.

"The greatest danger to young men," the speaker said, "is that they are unable to differentiate between the ideal and the real world. The tragedy is that most of us do not know where to stop our dreaming and to begin work."

There is no such person as a dreamer, he said. The world's greatest pianist practices at an instrument five hours daily. His own statement to Mr. Dabo would indicate that if he missed the daily practice he would not be a pianist.

Mr. Dabo summed up his address by asserting that the man who is a success is the one who can recognize the realities of life and separate them from his daydreams.—(Brooklyn Eagle.)

A GRIPPING TRAGEDY  
Author: I have here a gripping tragedy wherein a young man is on a desert island with two women.

Editor: But that plot has been used a thousand times.

Author: But this is not ordinary melodrama. The two women are his wife and his wife's mother.—(Life.)

Home From Trip  
Miss Gwen Witherspoon of Hollywood, who has been enjoying some weeks in Honolulu has come home and will be with her parents, Mr. and Mrs. Gavin Witherspoon at 747 Hawthorne avenue until she leaves for the north for Stanford University.

Home Again  
Mrs. Eustard Russell Young and twin children of 527 South Kingsley Drive, accompanied by her sister, Mrs. E. G. Adams, returned recently from an extended sojourn in Honolulu.

TWO WORDS SAID IT ALL  
Maybe some of our readers may not know the origin of "it floats," the catchy advertising line of a well-known soap company. The Jayhawk Press explains it:

"The perspiring copywriter engaged for the soap campaign produced this: The alkaline elements and the vegetable fats in this product are blended in such a way as to secure the highest quality of saponification, along with a special gravity that keeps it on top of the water, relieving the bather the trouble and annoyance of soap gravity that keeps it on the bottom during his ablutions."

For which bit of writing the advertising manager, when the copy reached him, substituted two words: "It floats."

## DOG-GONE LUCKY

Mongrel at Pound Picked by Star for Pet

When Ping, a mongrel, but the cherished pet of Helen Ferguson, film actress, died Friday, his mistress cried so broken-heartedly that the doctor offered her a bull terrier to replace the pup.

The terrier is an aristocratic dog. His sire is one of the finest in California.

But there was something about the homely 3-month-old pup which would not be replaced by a fine dog.

So yesterday the timorous of the actress rolled up to the city pound, where dozens of homeless dogs are kept. Miss Ferguson looked them over and found a mongrel pup something like Ping.

"That's the dog I want," she said. And she bought him, a mongrel pup, for \$2.

Sim Crabill says

"Speaking of beauty, one beautiful thing about Direct Advertising is that it enables the embryo business to compete with its powerful, established competitors."

WERE it not for Direct Advertising, many a meritorious product would die in its infancy. Without it, the new business having slender capital that dares to enter into competition with firmly entrenched rivals would stand about as much chance of success as Don Quixote had in his fantastic tilt with the windmill. Sheer weight of opposition in itself would bring defeat.

Direct Advertising is an effective result-producer within the means of the smallest enterprise. By its use apparently insurmountable odds can be overcome.

To buyers of Direct Advertising (folders, booklets, catalogs, broadsides, display cards) we offer more than first class printing at a fair price. We extend experienced, expert co-operation in the preparation of this material. Our Special Service Department exists solely for this purpose.

## Cooler With

And cooler kitchens this way

QUICK QUAKER cooks in 3 to 5 minutes

No hot kitchen, no muss, no bother

FLAVORY and delicious... the summer breakfast your appetite calls for and your health demands, cooked in 3 to 5 minutes!

The kitchen stays cool. And so do you. No frying, no stewing, no morning's fuss and trouble.

Just get Quick Quaker at your grocer's. It's a new kind of Quaker Oats that's made to order for women who seek easier ways in housekeeping.

All that rare Quaker flavor is there. All the richness that made Quaker Oats famous. Cooks faster, that's the only difference.

GOTHAM'S NIGHT LIFE

MODERATELY JAZZY

La Roque and Gish in Diver-  
ging Tale of Nocturnal Thrills  
and Adventure

BY HERBERT MOULTON

The Great White Way is ex-  
posed at last. All of its naughty  
after-theater diversions are held  
up shamelessly to the public gaze  
for commendation or condemnation  
—depending upon what kind of  
a public you happen to be.

Waterbury. And the expose it-  
self, which happens also to be ex-  
cellent, a green entertainment,  
makes its appearance down at the  
Metropolitan this week under the  
title of "Night Life of New York."

Don't expect to be shocked, how-  
ever. There's nothing sensational  
about it. There's not one inch of  
censorable film in its entire length.  
Nothing, even, that would bring a  
blush to the cheeks of a mid-  
Victorian grandmother. The sound  
like damaging testimony, let me  
hasten to assure you that it is  
really a compliment to both the  
author and the director. For in  
presenting Manhattan's mid-  
night madness in the guise of a  
have been absolutely truthful. Had  
they shown it to be any wilder  
than it appears to be, the film  
would have made too liberal a use  
of the cinema's license to prevari-  
cate.

Happily, it does not fade in on a  
telescope shot of the Woodworth  
Building. That is, the picture  
thing to expect, of course, in a  
picture with a name like "Night  
Life of New York." But instead,  
the virgin cornfields of Iowa prove  
to be the introductory locale, and re-  
veal the likable young hero in the  
process of being awakened by his  
vallet.

That this proved to be a sur-  
prise goes without saying. For  
whoever heard of a middle-west  
hero in the movies? And who, for  
that matter, ever heard of a mid-  
west movie hero having a vallet?  
Moreover, who ever saw a well-  
groomed youth like Rod LaRoque  
in a small Iowa town—on the  
screen. Vividly, the movies are  
longer in their infancy.

However, it all proves highly en-  
tertaining. This first sequence  
introducing the somewhat way-  
ward son of an indulgent father  
and there's plenty of mild, com-  
ing nature between the two. Er-  
nest Torrence plays the father  
and he does it in his own inimit-  
able way.

The scene shifts to Gotham quite  
naturally. The father is told by  
a friend that the best way to cure  
the reckless spirit in his offspring  
is to send him to New York and  
give him free rein. In that way,  
the friend avers, the son will have  
his fill of the gay and carefree  
life, will relent, and come home a  
sadder, but wiser youth.

The father finally agrees to the  
experiment, and with the capable  
aid of the Broadway dancer, Rod  
embarks on his New York career.  
He will make the big town scarlet  
where it was only pink before—his  
opinion.

Again the unexpected happens.  
Instead of midnight revelries and  
wild orgies, the hero falls in love  
with a perfectly respectable  
phone operator. True, he steps out  
with the chorine his father hired,  
but the notoriety of "night club"  
in the vicinity of Times Square,  
and is thrilled. But his greatest  
thrill comes when he meets a  
little lass from the hotel switch-  
board, and quite naturally, too,  
he falls for her. He is not alone  
in this. His father, friend, and  
even the phone operator, all  
love her. He is not alone in this.  
He is not alone in this.

Henceforward, Rod's adventures  
come rapidly. His father's friend  
advises him when he buys a taxi-  
cab rather than pay the bill. He be-  
comes an actor, a singer, a  
lyric, of course, to a robbery.  
The next day he is arrested and held  
in jail. His little lass, the phone  
operator, with the help of his father,  
lives happily. It is presumed,  
ever after.

Starting off as it does with a  
spurt that makes a great bid for  
humor, it is perhaps natural  
that the picture should lose some  
what thereafter. There is consid-  
erable footage that serves only  
as atmosphere, where the "night  
clubs" are shown, and several  
of the scenes of Times Square  
and Columbus Circle are short-  
ened to advantage. Otherwise,  
the story builds up pleasantly, with  
touches of the earlier humor re-  
turning.

Rod is the principal figure in  
the picture, for it is around him  
all of the action occurs. His per-  
formance is excellent in every re-  
spect, and his personality well  
suited to the role.

Dorothy Gish, too, is well cast  
as the telephone operator. She plays  
her part straight, without any  
of the exaggerations of character  
she sometimes employs. There is  
no rushing, no factitious senti-  
mentality. The betterment is striking.  
Ernest Torrence and George  
Hackett, as the father and the  
other, are excellent. Torrence's  
performance is different from those  
he usually plays. He is the stern  
father—but not too stern. Hackett  
is cast in one of those parts  
in which he is best known, as the  
"little brother" who is in-  
clined to be something of a weak-  
ling. He does it well, with his ac-  
customed finesse, only to be shot  
in the last reel.

Alma Rubens's direction is com-  
mendable in every respect. The  
story, which was written by Edgar  
Selwyn, develops logically, and an-  
swers less than one-tenth of one per-  
cent hokum.

Other features on the Metropolitan  
bill include a prologue, "Under  
the Brooklyn Bridge," which  
brings forth some enjoyable songs  
and dances presented by Messrs.  
Taylor, Parsons and Hawks. Edith  
Forsyth, Mack and Long, and Bill  
Pruitt; Helen York, coloratura so-  
prano; and the Metropolitan or-  
chestra in a medley offering "Mel-  
odies of Old New York."

And to the fact that a far-  
seeing director, Svend Gade, made  
her consistent to the end—brave in  
her surrender, not miraculously  
transformed into a sweet old lady,  
content to sit by the fire knitting  
socks.

The entire cast is remarkable,  
without one instance of miscas-  
ting. As the alien, Virginia Valli,  
is charming and more than sat-  
isfactorily capable. Broad-minded,  
intelligent, but enough of a young  
girl in love to resent too much  
interference with her home and her  
husband.

Which brings one, quite logi-  
cally, to the man himself. Eugene  
O'Brien is also excellent, as the  
weak member of a strong family,  
the pliable darling of his power-  
ful aunt. He is perfect in willing-  
ness to allow his wife to fight her  
battles alone and yet is logically the  
man to be adored by such a gal-  
lant woman.

Marc McPherron, as the mute, is  
utterly pathetic and almost un-  
comfortably convincing. And who  
the family, gathered in council,  
laughs at his poor, fumbling ges-  
tures of romance, is not miracu-  
lously transformed into a sweet old  
lady, content to sit by the fire knit-  
ting socks.

A young member of the clan  
strays from the beaten path so  
far as to marry a total stranger.

Theater.

PORTRAYALS FIRST AT CRITERION

If perchance there are those of

the feminine contingent who are

lured to the Criterion this week

by the title of "Fine Clothes" and

go to feast their eyes upon soul-  
stirring gowns, they will not have

this desire satisfied and will also

find that as in similar cases late-  
ly, the title has some subtle fig-

urative meaning known only to

the author himself.

Without knowing something of the

context of Franz Molnar's play,

"Fashion for Men," it is rather

difficult to judge just how com-  
ing nature between the two. Er-  
nest Torrence plays the father

and he does it in his own inimit-  
able way.

The scene shifts to Gotham quite

naturally. The father is told by

a friend that the best way to cure

the reckless spirit in his offspring

is to send him to New York and

give him free rein. In that way,

the friend avers, the son will have

his fill of the gay and carefree

life, will relent, and come home a

sadder, but wiser youth.

The father finally agrees to the

experiment, and with the capable

aid of the Broadway dancer, Rod

embarks on his New York career.

He will make the big town scarlet

where it was only pink before—his

opinion.

Again the unexpected happens.

Instead of midnight revelries and

wild orgies, the hero falls in love

with a perfectly respectable

phone operator. True, he steps out

with the chorine his father hired,

but the notoriety of "night club"

in the vicinity of Times Square,

and is thrilled. But his greatest

thrill comes when he meets a

little lass from the hotel switch-

board, and quite naturally, too,

he falls for her. He is not alone

in this. His father, friend, and

even the phone operator, all

love her. He is not alone in this.

Henceforward, Rod's adventures

come rapidly. His father's friend

advises him when he buys a taxi-

cab rather than pay the bill. He be-

comes an actor, a singer, a

lyric, of course, to a robbery.

The next day he is arrested and held

in jail. His little lass, the phone

operator, with the help of his father,

PLAYDOM

INGENIOUS THRILLS

"UNHOLY THREE" EXCEPTION-  
AL IN ACTING AND INTEREST

By Edwin Schallert

Yes—it really is a Greater Movie

Season. After seeing "The Unholy

Three," everyone will, I believe,

feel that they have seen it, at any

rate. The era of bigger produc-

tions has opened with a malo-

dramatic bias of glory this week

at Loew's State Theater. There

hasn't been so ingenious a thriller

in many days as the picture

which features Len Chaney, with

Mae Busch, Matt Moore and others

as the principal members of the

support.

Suspense is the thing that is ex-

ploited on the screen this time.

Sometimes it is dangled with too

much perfection, but in the whole,

"The Unholy Three" offers to the

view an immensely clever idea.

The new way in which the charac-

ter of the ventriloquist is depicted

—his final sacrifice for the sake

of the heroine, is perhaps the most

striking, although this bears no

particular resemblance to the oth-

er features. I cannot see that the

picture in its entirety falls in "The

Miracle Man" category. It is in-  
cluded to be more lurid. But is  
not any the less dramatically ef-

fective.

Tod Browning, who directed the

picture, has a fine flair for melo-

drama. The picture is literally

cramped with interesting incidents.

An entrancing spirit of humor fills

many of the sequences, drawn

chiefly out of the midwife's make-

up of baby clothes, somewhat ne-

farious love of jewelry, and his in-

evitable cigar.

Chaney has some rare moments

of acting. The scene in the court-

room when, for the sake of the

heroine, he is trying to use his ven-

triloquist talents to free the hero is

a wonder. It is an admirable

sketching through a scene of a

change of character, for this marks

the really big transition in his por-

trayal, from a fine actor to a tra-

gic character.

Deep feeling is evident in Miss

Busch's portrayal. She has never

indeed, done anything finer. Her

role discloses that she has excep-

tional powers in the dramatic line

and though her love for the hero
